The following notes are believed to be of general interest to all potential vendors.

1. The Materials Specification section originally read:

Material is to be scratch resistant, measuring at a “7” on the ‘*Measure Of Hardness Scale*’ (1-10 scale). Material is to be heat resistant, capable of withstanding temperatures up to 1200 degrees Fahrenheit. Material is to be wear and stain resistant and shall be sealed with a penetrating stone sealer. Countertops should be a 3 cm solid material with no lamination lines, and no sub-top required. Countertops and installation should come with a 1-year warranty.
